

Software Development Internship

Week 1 – Assignment 1

Build Your Personal Portfolio Landing Page

1. Assignment Overview

In this assignment, you will build a **personal portfolio landing page** that showcases your **skills, projects, certifications, and background** as a software developer.

Your portfolio will act as your **professional digital identity**, which you can later share with recruiters, clients, or collaborators.

The objective of this assignment is to help you:

- Practice **HTML, CSS, and JavaScript fundamentals**
- Understand **responsive web design**
- Structure a **professional developer portfolio**
- Learn **basic UI/UX principles**
- Deploy a static website

This assignment should take **8–10 hours to complete**.

2. Learning Objectives

By completing this assignment, you will learn:

- HTML semantic structure
 - CSS layout techniques (Flexbox / Grid)
 - Responsive design principles
 - Basic JavaScript interactivity
 - Hosting a static website online
 - Writing clean and readable code
 - Organizing a real-world project structure
-

3. Technology Stack

Minimum required:

- **HTML5**
- **CSS3**
- **JavaScript**

Optional frameworks (if you prefer):

- Bootstrap
- TailwindCSS
- React
- Next.js
- Vue

However, **plain HTML/CSS/JS is strongly recommended for beginners.**

4. Expected Time Allocation (8–10 Hours)

Task	Time
Planning layout	30 mins
HTML structure	2 hours
CSS styling	3 hours
Responsive design	1.5 hours
JavaScript functionality	1 hour
Testing	30 mins
Deployment	30 mins

5. Project Requirements

Your portfolio should include **at least the following sections.**

6. Required Sections

1. Hero Section (Introduction)

This is the **first section visitors will see**.

Include:

- Your name
- Short description (example: *Software Developer* | *Web Enthusiast*)
- Profile image (optional but recommended)
- Call-to-action button (example: **View My Work**)

Example:

Hi, I'm John Doe

Frontend Developer passionate about building modern web applications.

2. About Me Section

Write a short paragraph about:

- Your background
- What technologies you know
- Your interests in software development

Example topics:

- Programming languages
 - Areas of interest (AI, Web Dev, Cloud, etc.)
 - Career goals
-

3. Skills Section

Showcase your **technical skills**.

Example categories:

Programming Languages

- JavaScript
- Python
- Java
- C++

Web Technologies

- HTML
- CSS
- React
- Node.js

Tools

- Git
- GitHub
- Docker
- VS Code

You can present them as:

- Skill cards
 - Icons
 - Progress bars
-

4. Projects Section

Add **2–3 sample projects**.

Each project should include:

- Project title
- Short description
- Technologies used
- GitHub link (if available)

Example:

Weather App

A simple application that fetches weather data using an API.

Technologies used:

- JavaScript
 - OpenWeather API
 - HTML/CSS
-

5. Certifications / Achievements

Add any:

- Online certifications
- Hackathons
- Coding competitions
- Courses

Example:

- Google Data Analytics Certificate
 - Meta Frontend Developer Certification
 - AWS Cloud Practitioner
-

6. Contact Section

Provide ways for people to reach you.

Include:

- Email
 - LinkedIn
 - GitHub
 - Optional: Contact form
-

7. Footer

Add a footer containing:

© 2026 Your Name
Built with HTML, CSS, and JavaScript

7. Design Requirements

Your portfolio must:

- ✓ Be **responsive (mobile friendly)**
- ✓ Have **clean typography**
- ✓ Use **consistent colors**
- ✓ Have **good spacing and layout**
- ✓ Include **smooth scrolling navigation**

Optional enhancements:

- Dark mode

- Animations
 - Hover effects
 - Scroll animations
-

8. Suggested Project Structure

```
portfolio-website/  
|  
├── index.html  
├── style.css  
├── script.js  
|  
├── images/  
└── README.md
```

9. Basic JavaScript Features (Required)

Include at least **one interactive feature**, such as:

- Smooth scroll navigation
- Mobile menu toggle
- Scroll animations
- Contact form validation
- Theme toggle (dark/light)

Example:

```
document.querySelector("button").addEventListener("click", function() {  
  alert("Welcome to my portfolio!");  
});
```

10. Deployment

You must deploy your portfolio online.

Recommended free platforms:

GitHub Pages

<https://pages.github.com/>

Netlify

<https://www.netlify.com/>

Vercel

<https://vercel.com/>

Your submission must include a **live link**.
