GRADUATE SOFTWARE DEVELOPER

Full-Stack Development • RESTful APIs • Object-Oriented Programming • Data Structures & Algorithms • Web & Backend Development

SUMMARY

BSc Computer Science graduate from the **University of Westminster** with hands-on experience in full-stack development, RESTful APIs, and algorithm optimisation. Skilled in Java, Python, C++, JavaScript, and SQL, delivering scalable, maintainable, and high-performance solutions. Experienced in Git, Docker, and Agile methodologies, with a keen ability to learn new languages and technologies quickly. Adept at collaborating in development teams, participating in code reviews, and translating complex requirements into efficient software solutions.

EXPERTISE

- **Programming Languages:** Java, Python, C, C++, C#, JavaScript (ES6+), SQL, PHP, Kotlin (basic)
- **Frameworks and Libraries:** React, Django, Spring Boot
- **Web & Backend Development:** RESTful APIs, MVC Architecture, CRUD operations, Object-Oriented Programming
- **DevOps and Tools:** Git/GitHub, Linux, Docker, Postman, Swagger, CI/CD pipelines, Agile/Scrum, unit testing, debugging
- **Databases:** MongoDB, MySQL/PostgreSQL (fundamentals), SQLite
- **Algorithms & Data Structures:** Graph algorithms, BFS/DFS, Search & Sort optimisation, Minimax & Alpha-Beta pruning
- **Soft Skills:** Collaborative development, peer mentoring, problem-solving, proactive learning, technical documentation

PROFESSIONAL EXPERIENCE

Sky Ltd

London, UK

Software Engineer

January 2025 – April 2025

*Developed scalable web applications and enhanced user experiences using **React and modularised backend systems**.*

Collaborated with QA and backend teams, participated in code reviews, and documented core features to ensure maintainable, high-quality software.

Key Achievements & Impact:

- Engineered a real-time React health platform for 5,000+ users, boosting dashboard performance by 30%.
- Designed modular database schemas for 10+ modules, accelerating feature rollout and maintainability.
- Mentored 12 team members on architecture and coding standards, improving overall team productivity.
- Modernised UI with Bootstrap, resolving usability issues and improving site navigation.
- Streamlined front-end code, reducing average page load time from 2.5s to 1.9s.
- Participated in code reviews, fixing 30+ critical bugs and increasing platform reliability.
- Authored technical documentation for 10 core features, enabling seamless handovers.

Technokraft Ltd

India

Backend Developer

June 2023 – August 2023

Built and maintained backend systems, RESTful APIs, and dashboards, improving data accessibility and operational efficiency.

Ensured high system reliability and usability for stakeholders.

Key Achievements & Impact:

- Developed RESTful APIs for IT incident reporting, maintaining 99.9% uptime across 65+ weekly incidents.
- Created 3 interactive dashboards, reducing reporting time by 25% for 50+ stakeholders.
- Optimised 15+ SQL queries, improving response times by 20% for critical endpoints.
- Integrated backend services with front-end dashboards, improving usability for non-technical users.
- Automated incident tracking workflows, cutting manual effort by 30% across 3 IT teams.
- Supported architecture and code design discussions, improving overall system efficiency.
- Participated in knowledge sharing sessions to upskill junior developers in backend development.

PROJECTS

Bookstore REST API (Java + JAX-RS)

2025

- Developed a modular RESTful API supporting CRUD operations for 500+ books and customers.
- Validated 12+ weekly API scenarios using Postman, achieving 100% automated test pass rate.
- Optimised SQL queries, reducing response times by 25% for daily user requests.
- Authored Swagger documentation for seamless frontend integration.

Max Flow Network (Java)

2025

- Implemented Edmonds-Karp algorithm optimising paths for 1,000+ nodes across multiple networks.
- Enhanced algorithm performance, reducing runtime by 12% on complex, large-scale datasets.
- Devised debugging utilities and automated flow reports, accelerating testing of 50+ scenarios.
- Produced technical documentation, supporting replication and knowledge transfer across 2 development teams.

Algorithms Project (Python)

2025

- Built BFS graph search for 1,000+ nodes, improving traversal efficiency.
- Designed Tic-Tac-Toe AI with minimax and alpha-beta pruning, achieving optimal gameplay.
- Optimised data structures, increasing algorithm efficiency by 35%.
- Generated structured documentation for reproducibility and collaboration.

EDUCATION

University of Westminster

London, UK

BSc Computer Science

September 2023 – Present

Key Modules: Data Structures & Algorithms, Software Development, AI & Machine Learning, Databases, Networks & Security

ADDITIONAL INFORMATION

LANGUAGES: English (Fluent), Hindi (Native)

INTERESTS: Coding, AI, Web Development, Open Source Projects, Gaming, Reading, Sports
